Reg. No									

St. Joseph's college f Arts & Science (Autonomous)
St. Joseph's College Road, Cuddalore–607001
B. Sc DEGREE EXAMINATION-APRIL 2021
BC508-IMMUNOLOGY

Time: 3 hrs **Max Marks: 75**

SECTION–A (25X1=25)

Answer ALL the questions

I choose the best answer: (10X1=10)

1. Which of the following is not part of the innate immunity?
   a) Skin b) Alveolar mucosa c) Memory cells d) Phagocytes
2. Identify a cell type involved in phagocytosis.
   a) Neutrophils b) Macrophage c) Dendritic Cells d) All of them
3. Of the following, which is a primary lymphoid organ?
   a) Thymus b) Spleen c) Lymph node d) Liver
4. The ability of a substance to induce an immune response is termed as
   a)Compatibility b) Tolerance c) Immunity d) Immunogenicity
5. The type of immunoglobin produced as part of secondary immune response is
   a) IgG b) IgM c) IgD d) IgE
6. The type of immunoglobin present on mast cells are
   a) IgE b) IgM c) IgA d) IgG
7. Pentametic immunoglobins are
   a) IgA b) IgM c) IgD d) IgE
8. The type of T-cell involved in B Lymphocyte stimulation is
   a) CD4 b) CD8 c) NK d) Tc

9. In immunodiffusion, precipitation arc is form at zone of -----
   a) Equivalence b) Antigen excess
   c) Antibody excess d) None
10. Pregnancy test kits are based on presence of ---- in urine
   a) Antibodies b) hCG c) Glucose d) Growth factors

II Say true or false (5X1=5)

11. Ig A is found in body secretions like milk, sweet and tears.
12. Memory B cells are part of the acquired immunity.
13. Ig D is involved in mast cell degranulation and allergy.
14. Recognition of invading pathogens is primary cause of antoimmune disease.
15. Widal test is performed to detect typhoid.

III Answer all the questions (10X1=10)

16. What is a primary lymphoid organ?
17. What is innate immunity?
18. What is phagocytosis?
19. What are plasma cells?
20. What are haptens?
21. What is NK cell?
22. What is antigenicity?
23. Name any two autoimmune disease.
24. What is an immune complex?
25. Give the full form of RIA and ELISA.

SECTION-B (4X5=20)

Answer any FOUR of the following

26. What are the different components of innate immunity?
27. How does antigen-antibody reaction contribute to immune response?
28. What are the different classes of Immunoglobins?
29. What are antigen presenting cells (APC)?
30. Explain the principle and procedure of double immune diffusion reaction.
31. How is antigen-antibody reaction involved in ELISA?

SECTION-C (3X10=30)

Answer any THREE of the following:

32. What is acquired immunity? How is it regulated?
33. What is Complement cascade? What are its significance?
34. Discuss the role of MHC in the coordination and regulation immune response.
35. Give a detailed account of hypersensitivity reactions.
36. Explain the principle and applications of immunoelectrophoresis.
