CA203T - OBJECT ORIENTED PROGRAMMING USING C++

Time : 3 hrs **Max Marks :75**

SECTION - A (5X5=25)

Answer any **FIVE** Questions

1. List and explain the advantages of OOP.
2. Describe the operators in C++.
3. Explain the various member functions of I/O stream class with example.
4. Explain parameter passing in C++.
5. Write the C++ program to swap the two numbers using functions.
6. What is meant by polymorphism? Explain.
7. Describe the significance of using constructors and destructors with example.
8. Write a short note on error handling during file manipulations.

SECTION - B (5X10=50)

Answer any **FIVE** Questions

9. Elaborate on the basic concepts of OOP.
10. Give a detailed account on manipulators in C++.
11. Explain the working of the member functions of I/O stream classes.
12. Illustrate the working of function overloading in C++.

13. Explain binary operator overloading with Example.
14. Explain the various types of inheritance with example.
15. Describe the various methods of opening and closing of a file.
16. Write a C++ program to perform the basic operations in an employee file.
