Reg. No									

St. Joseph's College of Arts & Science (Autonomous)

St. Joseph's College Road, Cuddalore – 607001

CA306S – COMPUTER GRAPHICS

Time : 3 hrs **Max Marks :75**

SECTION - A (5X5=25)

Answer any **FIVE** Questions

1. Write a note on hardcopy devices.
2. Explain mid point circle drawing algorithm.
3. Write a note on the transformation – reflection.
4. How Matrix representations of the basic transformations can be reformulated for efficiently process the transformation sequences?
5. Write algorithm and explain Cohen-Sutherland line clipping algorithm.
6. Discuss on valuator and pick input devices.
7. How wireframe objects are displayed using depth cueing?
8. Explain about three dimensional rotation transformations.

SECTION - B (5X10=50)

Answer any **FIVE** Questions

9. With neat sketch, explain the architecture of raster scan system.
10. Write algorithm and explain Bresenham's line drawing algorithm.
11. Give a note on character attributes.

12. What are the basic transformations for a two dimensional object? Explain.
13. Explain polygon clipping.
14. Elaborate on interactive picture construction techniques.
15. Write a note on three dimensional display methods.
16. What are the various methods for projecting the three dimensional objects onto a two dimensional view plane? Explain.
