Reg. No									

St. Joseph's College of Arts & Science (Autonomous)
St. Joseph's College Road, Cuddalore–607001
B. Sc DEGREE EXAMINATION-APRIL 2021
EBC509-MEDICAL BIOCHEMISTRY

Time: 3 hrs **Max Marks: 75**

SECTION-A (25X1=25)
Answer ALL the questions

I choose the best Answer (10X1=10)

1. When the entire CBC is suppressed due to either anaemia, infection or haemorrhage is called

   a) Erythroplasia b) Thrombocytopenia c) Pancytopenia d) Leukopenia

2. Total RBC count for women is

   a) 4.4 – 6 b) 4.2 -5 c) 4.0 -5 d) 4,2 – 5.2

3. Which of the following complication is less likely to occur in the type II Diabetics, as opposed to type I Diabetics

   a) Retinophaty b) Weight

   c) Hypoglycaemia coma d) Cardiovascular disease

4. Normally degradation of Glycogen produces

   a) More Glucose than Glucose 1- P

   b) More Glucose 1 – P than Glucose

   c) Only Glucose 1-P

   d) Only Glucose

5. The diet of a child suffering from maple syrup disease should be low in which of the following amino acid content?

   a) Branch chain amino acid b) Phenyl alanine

   c) Alanine d) Tryptophan

6. Degradation of Hb takes place in

   a) Mitochondria b) Erythrocytes

   c) Cytosol d) Retioculoendothelial Cells

7. Mac Ardle's disease caused due to the deficiency of the enzyme

   a) Acid Maltase b) Glucose -6- Phosphatase

   c) Muscle Phosphatase d) Hepatic Phosphatase

8. Von Gierke's disease is characterised by a deficiency of enzyme

   a) Glucokinase b) Glucose -6- Phosphatase

   c) Glycogen Synthase d) De- branching enzyme

9. The synthesis of all of the following expect one is deficiency in a patient suffering from the Phenylketonuria

   a) Melanin b) Melatonin c) Catecholamine d) Thyroid Hormone

10. In which condition, the exposed urine turns black

    a) PKU b) Alkaptonuria c) Albinism d) Cystinuria

II True or False (5X1=5)

11. During the starvation the major source of blood glucose is Gluconeogenesis
12. Hydroxy urea increases haemoglobin production and decreases reticulocyte cells
13. The slow moving fraction of LDH Isoenzymes LD5C is typically elevated in patient with hepatitis
14. Transferrin is the major metabolically available storage form of iron in the body

15. ALT is more sensitive for liver diseases than AST

III Answer in one word (10X1=10)

16. The bilirubin which as passed through the liver cell is called as ---------
17. Expand BSP.
18. Define Pancreatitis
19. What is hypoglycaemia?
20. Define liver cell Necrosis
21. Define Fatty liver
22. Normal value of bilirubin in ---------- blood
23. Define Albinism
24. What is Fructosuria?
25. Define Isoenzymes

SECTION-B (4X5=20)

Answer any FOUR of the following

26. Explain about natural anti-coagulant and artificial anti-coagulant.
27. What is diabetes mellitus? Explain the symptoms and signs.
28. Describe about phenylketonuria and Alkaptonuria.
29. What is acidity? Explain about hypo and hyper acidity.
30. Explain about plasma and non-plasma enzymes
31. Explain about exogenous and endogenous transport mechanism of lipids.

SECTION-C (3X10=30)
Answer any THREE of the following

32. a) Describe about Iso-enzymes pattern is pancreatitis.

    b) Explain about myocardial infarction.

33. What is jaundice? Explain about types of the jaundice.

34. What is GTT? Explain about uses of GTT.

35. Explain the following terms.

    1. Glycosuria
    2. Galactosemia
    3. Galactosuria
    4. Fructosuria

36. i) Explain about the blood and Urine collection method.

    ii) Preservatives of blood
