Reg. No									

St. Joseph's College of Arts & Science (Autonomous)

St. Joseph's College Road, Cuddalore–607001

B. Sc DEGREE EXAMINATION-APRIL 2021

EBC509B-ENVIRONMENTAL TOXICOLOGY AND HERBAL MEDICINE

Time: 3 hrs **Max Marks: 75**

SECTION-A (25X1=25)

Answer ALL the questions

I. Choose the best Answer (10X1=10)

1. The common hepatoxin

   a. CCL_4 b. Ethanol c. Bromobenzine d. All the above

2. Which of the following Cox enzyme is involved in tissue homeostasis?

   a. COX-3 b. COX-2 c. COX-1 d. All the above

3. Which of the following is a neurotoxin?

   a. Isoniazid b. 6- Hydroxydopamine c. MPTP d. All of the above

4. The phase I reaction is termed as

   a. Conjugation reaction b. Synthetic reaction

   c. Non-synthetic reaction d. All the above

5. Conversion of toxicants to more toxic substance is termed as

   a. Concentration b. Biotransformation

   c. Detoxication d. Accumulation

6. Various factors that affect toxicity of chemicals are

   a. Duration of exposure b. Species

   c. Concentration d. All the above

7. Which is used for memory booster?

   a. Curcuma longa b.Papaya

   c. Centella asiatia d.Azardica indica

8. The common means of entry for toxic compound is

   a. GI tract b. Lungs c. Skin d. All the above

9. One substance decreasing the toxic effect of another toxic substances is termed as

   a. Additive effect b. Collative effect

   c. Antagonism d. Synergism

10. The disposition of toxic compound in a biological system is divided into

    a. Two phase b. Three phase c. Four phase d. Five phase

II. True or False (5X1=5)

11. Bio concentration of toxin is inversely related to exposure concentration.
12. Some toxic metals are stored in hairs and nails.
13. Biliary excretion is a complementary route of toxicant excretion.
14. Conjugation reactions are phase I reactions.
15. The time between exposure and effect of toxicant is latency period.

III. Answer in one word (10X1=10)

16. Drug
17. Acute toxicity
18. Bio concentration
19. Long term exposure
20. LC_{50}
21. Bio indicator
22. Herb

23. Withania somnifera
24. NSAID
25. Urolithiasis

SECTION-B (4X5=20)
Answer any FOUR of the following

26. What are toxicants? How are they classified?
27. Explain the three major routes of absorption of toxicants.
28. Write briefly on cyclo oxygenase enzymes and their function.
29. List out the common constituents of herbs and high light their functions.
30. Differentiate acute and chronic toxicity.
31. Write brief notes on anti cancer drugs.

SECTION-C (3X10=30)
Answer any THREE of the following

32. Write briefly on the signs, symptoms and treatment for dengue fever.
33. With suitable example justify herbs for the treatment of common ailments.
34. Illustrate the nature of toxicants receptor interaction.
35. Explain different types of conjugation phenomena in the biotransformation process.
36. Enumerate the structural and functional alteration caused by toxicants on nervous system.
