a) acid b) schiff's stain c) red stain d) methlyene blue

7. Red cells are formed in

a) bone marrow b) liver c) heart d) brain

8. The most common fixative is

a) chloride b) formalin c) glucose d) maltose

9. The counter stain used in gram stain is

a) crystal violet b) gram iodine c) acetone d) none

10. The Ziehl-Nesslson stain is used for staining

a) bacillus b) mycobacterium tuberculosis c) rhizobium d)streptococcus

II. Say true or false (5X1=5)

11. Sodium is a counter ion for calcium.
12. Throat swab were examined in respiratory infection.
13. ESR is connected with WBC.
14. Enrichment media is supplied by adding glucose.
15. Gram negative bacteria is resistant to antibiotic.

III. Answer all the questions (10X1=10)

16. What is plasma?
17. Mention any two anticoagulants.
18. What is dehydration?
19. Write isoenzymes of LDH.
20. What is hypoglycemia?
21. Define clotting time.
22. Which one is the major blood protein?
23. Write any two functions of centrifuge.
24. Define culture media
25. Mention the equipments needed for blood collection.

SECTION-B (4X5=20)

Answer any FOUR of the following:

26. Give a brief note on collection of stool
27. Write a note on electrolytes
28. Give a short note on antibiotic sensitivity test
29. Briefly write about the ABO blood grouping
30. Write a brief note on sectioning.
31. Give an account about the role of abnormities of LDH.

SECTION-C (3X10=30)

Answer any THREE of the following:

31. Write a detailed note on instrumentation to clinical laboratory.
32. Explain the principle and procedure of total RBC count
33. Discuss in detailed about histopathological studies
34. Explain the clinical significance of ALP.
35. Write a note on the safety procedures in microbial techniques.
