St. Joseph's college f Arts & Science (Autonomous)

St. Joseph's College Road, Cuddalore–607001

B. Sc DEGREE EXAMINATION-APRIL 2021

EBC614B- MEDICAL LABORATORY TECHNOLOGY

Time: 3 hrs **Max Marks: 75**

SECTION-A (25X1=25)

Answer ALL the questions

I choose the best answer: (10X1=10)

1. Gram molecular weight of a substance in one litre solution is

   a) isoosmolar b) one gram c) one molar d)one normal

2. GLP stands for

   a) Great Lab practice b) Good Lab protocol

   c) Good Laboratory practice d)Great Laboratory practice

3. Neutrophil count is high in.

   a)Acute bacterial infection b) Iron deficiency anemia

   c)Megaloblastic anemia d) rickets

4. Heparin is a

   a) Protein b) Enzyme c) Polysaccharide d) Oligosaccharide

5. The most common fixative is

   a) chloride b) formalin c)glucose d)maltose

6. The thin frozen sections are mounted on a

   a**)** table b)beaker c) glass slide d)tube

7. Acid Phosphatase is elevated in

a) Pancreatic tumor b) prostate tumor c) liver tumor d) bone tumor

8. One of the following enzymes is increased in the blood during heart attack.
   a)amylase b)LDH c)urease d) acid phosphatase
9. Which one of the following bacteria contain more peptidoglycan
   a) Gram positive bacilli b)Gram negative bacilli c)Chlamydia d) Rickettsiae
10. The most common growth media for microorganisms is
    a) pectin media b)lipid medium c)protein medium d) nutrient broth

II. Say true or false (5X1=5)

11. Buffer solution contains a weak acid and its salt.
12. RBC count is increased in anemia.
13. Hematoxylin is used to stain nuclei with blue.
14. Amylase is present in pancreatic secretion.
15. Nutrient agar is a basic medium.

III. Answer all the questions (10X1=10)

16. Define osmolarity.
17. What are anticoagulants?
18. What is ELISA.
19. What is ESR?
20. What is histopathology?
21. Mention the chemicals used for staining the tissue slides.
22. What is the clinical significance of SGPT?
23. Write the name of the serum enzymes elevated in jaundice.
24. What is gram staining?
25. What are the common culture media used for microbial culture?

SECTION-B (4X5=20)

Answer any FOUR of the following:

26. Discuss about the smear preparation and types.
27. Write a note on blood clotting time.
28. Describe the principle and procedure of screening tests for HBsAg.
29. Write a note on the staining techniques.
30. Give an account on clinical significance of blood triglycerides and uric acid.
31. Describe the Ziehl–Neilson staining of microbes.

SECTION-C (3X10=30)

Answer any THREE of the following:

32. Explain the process of collection and preservation of biological samples.
33. Discuss in detail about blood grouping.
34. Describe the principle and methodology of slide preparation in histopathology.
35. Explain the clinical significance of calcium and serum acid phosphatase in diagnosis.
36. Describe in detail about the principle and methodology of antibiotic sensitivity tests.
