Reg. No									

St. Joseph's College of Arts & Science (Autonomous)

St. Joseph's College Road, Cuddalore – 607001

ECA511 - DATA COMMUNICATION NETWORKS

Time : 3 hrs **Max Marks :75**

SECTION – A (5X5=25)

Answer any **FIVE** Questions

1. Discuss the three classification of the transmission modes.
2. Discuss the simple and composite periodic signals with example diagram.
3. Explain briefly the error correcting and detecting codes.
4. Write short notes on Internetworking devices.
5. Discuss the basic concept of flow and error control of data link layer.
6. Describe the key elements of protocols and its standards organization.
7. Explain the data circuit terminal equipment's and its functions.
8. How does the router differ from a bridge? Explain.

SECTION – B (5X10=50)

Answer any **FIVE** Questions

9. What are the important topologies for networks? Explain with diagram.

10. Describe the analog transmission and digital transmission methods in detail.

11. Explain the basic concept of frequency division. multiplexing(FDM) and Wavelength Division Multiplexing(WDM)

12. Explain the following
(i). Packet switching
(ii).Routers and gateways

13. Discuss the principles of Link State Routing algorithm.

14. How the TCP/IP protocol is differs from the OSI Model? Explain the relationship of layers and addresses in TCP/IP.

15. Discuss the basic concept of vertical redundancy check and longitudinal redundancy check with example.

16. Explain the basic concepts of distance vector routing algorithm.
